

# Assembly/Installation Instructions

## Micro Projector Lift Plenum Housing by Draper

### Installing Micro Projector Lift Plenum Housing

The Plenum Housing is shipped pre-assembled in its shortest position. The height of the plenum can be adjusted by moving the screws to different mounting holes in side panels. You can install the plenum housing in a pre-assembled state or as separate components, which will require that the plenum housing be completely disassembled prior to installation.

Please note that if the plenum is to be installed in a space where there is no access from above the plenum, then it is recommended that the Micro projector Lift be installed to the upper section prior to installing the plenum housing.

Please refer to drawing below for these instructions.

- ① Install top section of plenum housing using outer four holes located on top of upper section.
- ② Attach Micro Projector Lift to upper section of plenum housing through the inner four holes in the upper section with the  $\frac{5}{16}$ " -18 x  $\frac{7}{8}$ " hex head screws,  $\frac{5}{16}$ " flat washers, and lock washers provided with plenum housing. The lock washers should be used *above* the plenum housing (one per screw); the flat washers should be used *between* the plenum housing and the MPL (three flat washers per screw).
- ③ Attach the two flat panels of the middle section across from each other with the clinch nuts to the outside of the housing.
- ④ Attach the two middle section panels with the formed ends across from one another.
- ⑤ Attach lower section of plenum housing.
- ⑥ Use 1" foil tape (roll provided with plenum housing) to cover any unused screw holes in plenum housing.
