

## FLEXGREY 2.0

Euroscreen now present the upgraded FLEXGREY 2.0 with even better flatness and possibility to use in larger screens. An excellent option for those who want extraordinary blackness and color saturation and at the same time a fabric with optimal smoothness! FlexGrey 2.0 provides excellent image even in bright light, optimal colour rendition and full depth, Full 8K resolution. FlexGrey 2.0 is a stretch material that can be used in both permanently tensioned products and motorized with TabTension. Used in Tab Tension screens, the grey surface provides a natural framing of the projected image, which gives you the option to turn down black borders.

<b>8K</b> RESOLUTION	<b>0,67</b> GAIN
<b>0.3</b> THICKNESS	<b>180°</b> VIEWING ANGLE

### SCREEN SURFACE

- Front projection
- Gain 0,67
- Viewing angle 180°
- Thickness 0.3 mm
